

South Park Health Service District Moves Forward on Securing Health Care.

The South Park Health Service District, Board of Directors are making progress in their attempt to find viable health care for the South Park Community and surrounding areas.

Negotiations are in process with an organization willing to serve our community full time. Once a contract is signed the board will invite the community to attend planned Meet and Greets to talk to our new providers so they can learn about our residents' needs.

For any updates on the process with securing health care to South Park please contact any of our five board members through our website at sphsdistrict.org where you can send your questions.
